This dynamic short course focuses on the analysis of image and the development of style. From the definition of fashion moods to the importance of accessories, participants will evaluate aspects related to traits of the body and learn how to enhance and complement physical characteristics. They will work on the development of an individual style through the construction of a 'total look' and capture it for a photo shoot via a vocational learning approach.

Planning and Women

LONDON, United Kingdom — The least glamorous, but possibly the most important aspect of bringing a fashion product or collection to market is production and manufacturing. Production describes the process by which concepts are made into a saleable physical product. In most cases, this means going from a small set of samples or prototypes to commercial quantities of the item or style, often ...
